

# List of Qualifying Toilet Models

1.1 gallons per flush or less average flush volume

September 2015

This List of Qualifying Toilet Models is valid for the service providers listed below. Contact your local water or sanitation service provider for information about the toilet retrofit and incentive programs available in your area. **Always determine your program eligibility before purchase.** Requirements and restrictions apply and vary by service provider.

This list is updated periodically. To view or download the most current list, visit your service provider's website or call your service provider.

## Participating Sanitation Service Providers

Airport / Larkfield / Wikiup Sanitation Zone  
 Geyserville Sanitation Zone  
 Occidental County Sanitation District  
 Penngrove Sanitation Zone  
 Russian River County Sanitation District  
 Sea Ranch Sanitation Zone  
 Sonoma Valley County Sanitation District  
 (707) 547-1918

## Participating Water Service Providers

City of Rohnert Park - (707) 585-6715  
 City of Sonoma - (707) 933-2237  
 City of Sebastopol - (707) 823-8597  
 Sweetwater Springs Water District - (707) 869-4000  
 Valley of the Moon Water District - (707) 996-1037

**Abbreviations**

WS - WaterSense Labeled Toilet

MaP Score - Maximum Performance Testing Score

NM - Not Measured for maximum performance - flushes at least 350 grams to meet EPA WaterSense standards

DF - Dual Flush

PA - Pressure Assist

GF - Gravity Assist

EL - Elongated Bowl

RF - Round Front Bowl

ADA - Americans with Disabilities Act Compliant

**Maximum Performance (MaP) Testing - a better measurement of toilet performance!**

Many toilet fixture performance tests exist, including proprietary tests by the fixture manufacturers, tests by Consumer Reports magazine, and the tests mandated by the plumbing codes for fixture certification. Few of these, however, use test media that closely resembles the real “demands” upon a toilet.

The Maximum Performance (MaP) testing project was undertaken in 2003 in order to identify how well popular toilet models perform using a realistic test media. A new testing protocol, cooperatively developed by water-efficiency and plumbing fixture specialists in the U.S. and Canada, incorporated the use of soybean paste as a test media, closely replicating the “real world demand” upon fixtures. This protocol has been adopted by the U.S. Environmental Protection Agency for their WaterSense program.

The test media is measured in grams and toilet performance is determined by how much test media it can successfully flush. Toilets on this list of qualifying models have a MaP test performance of at least 350 grams and are WaterSense labeled.

For more information on MaP testing and to download the complete report, visit <http://www.map-testing.com>
